**Subject:** Clayton Community Church

Dear Clayton Planning Commission Members,

**Why** is this planned to be built in a residential area? **Why** not in downtown Clayton since this is a community church?

I have a strong concern about the impact this CCC project will make to the City of Clayton, my neighborhood and the existing elementary school. It will bring additional traffic congestion, noise, lightening, air quality and safety concerns that have not been adequately addressed by its initial plans and studies. **Will** the entrance come from downtown Clayton, in order to avoid the increase in traffic, noise, air quality and safety concerns?

As a resident of Clayton, I request that you deny the proposal for a "mitigated negative declaration" and insist that you **require a full environmental impact study** before any permits or plans are approved.

Thank you for your attention to this matter,

Cristina Reyes
