Much as been said about the impact of adding 560 units in this round of the housing element. For the most part, the impacts have focused on traffic, air quality, fire escape routes, etc . No one has addressed the impact on the water supply to support this and other proposed growth. The only factor considered is the need for “affordable” housing. These homes can be built much faster than infrastructure components.

All indications is that the drought will continue and in fact, worsen due to climate change. What is being done to address “ALL” impacts?

Please consider adding 6530 and 6500 Marsh Creek Rd. to have 30 units as you have done to 6470 Marsh Creek Rd.

Also, the commission should know construction documents for all three building permits are finished and Dana has received architectural and landscape last week for her review.

Once approved, we'll submit to county.

Btw, its dicey down at the county building department for permits and we are hopeful to get them by deadline.

Time is of the essence for our submittals.
