Subject: Public Comment regarding support for Our Neighborhood Voices

Honorable Council members,

After reading about the proposed resolution in support of Our Neighborhood Voices in the agenda, I felt compelled to submit these comments.

I am very concerned about the City supporting an organization that uses inflammatory language to state its purpose and win others to its cause. The language on ONV's website was designed to foment anger and supporting it would be irresponsible of the City. Doing so could potentially curtail any ability to push back on developers to make any reasonable change to a proposal (i.e. parking, offset, etc.) because the developers will have an official resolution showing that the City supports an organization opposed to the any new housing laws.

Regardless of how Council members feel about the organization individually, it would be reckless and could potentially harm the city to align with this organization. I urge you as a Council not to endorse Our Neighborhood Voices.

Thank you for your consideration.

Honorable Clayton city council members,

After reading, and learning more about the proposed resolution and support of Our Neighborhood Voices in the agenda, I felt compelled to submit the following comments.

I am highly concerned about our city, supporting an organization that uses inflammatory language and rhetoric to state its purpose and to garner support. The language on their website is designed to foment anger, and supporting it would be irresponsible for our beloved city. Doing, so could curtail the ability of our city to push back against developers to make reasonable changes to things such as parking and other issues that could ultimately be harmful to our city.

Regardless of how any council members feel about this organization, it would be reckless and irresponsible and could ultimately harm our beloved city to align with an organization such as this.

I strongly encourage this entire council to not support this organization. I do so as a long-standing resident of this city who cares deeply about what happens here. Thank you kindly for your time.
