Public Safety, Infrastructure, Accessibility

Holly Tillman & Kim Trupiano

Common Vision - Improve pedestrian safety throughout the City as part of the City's 10-year Capital Improvement Plan

Public Safety, Infrastructure, Accessibility
Strategic Objective

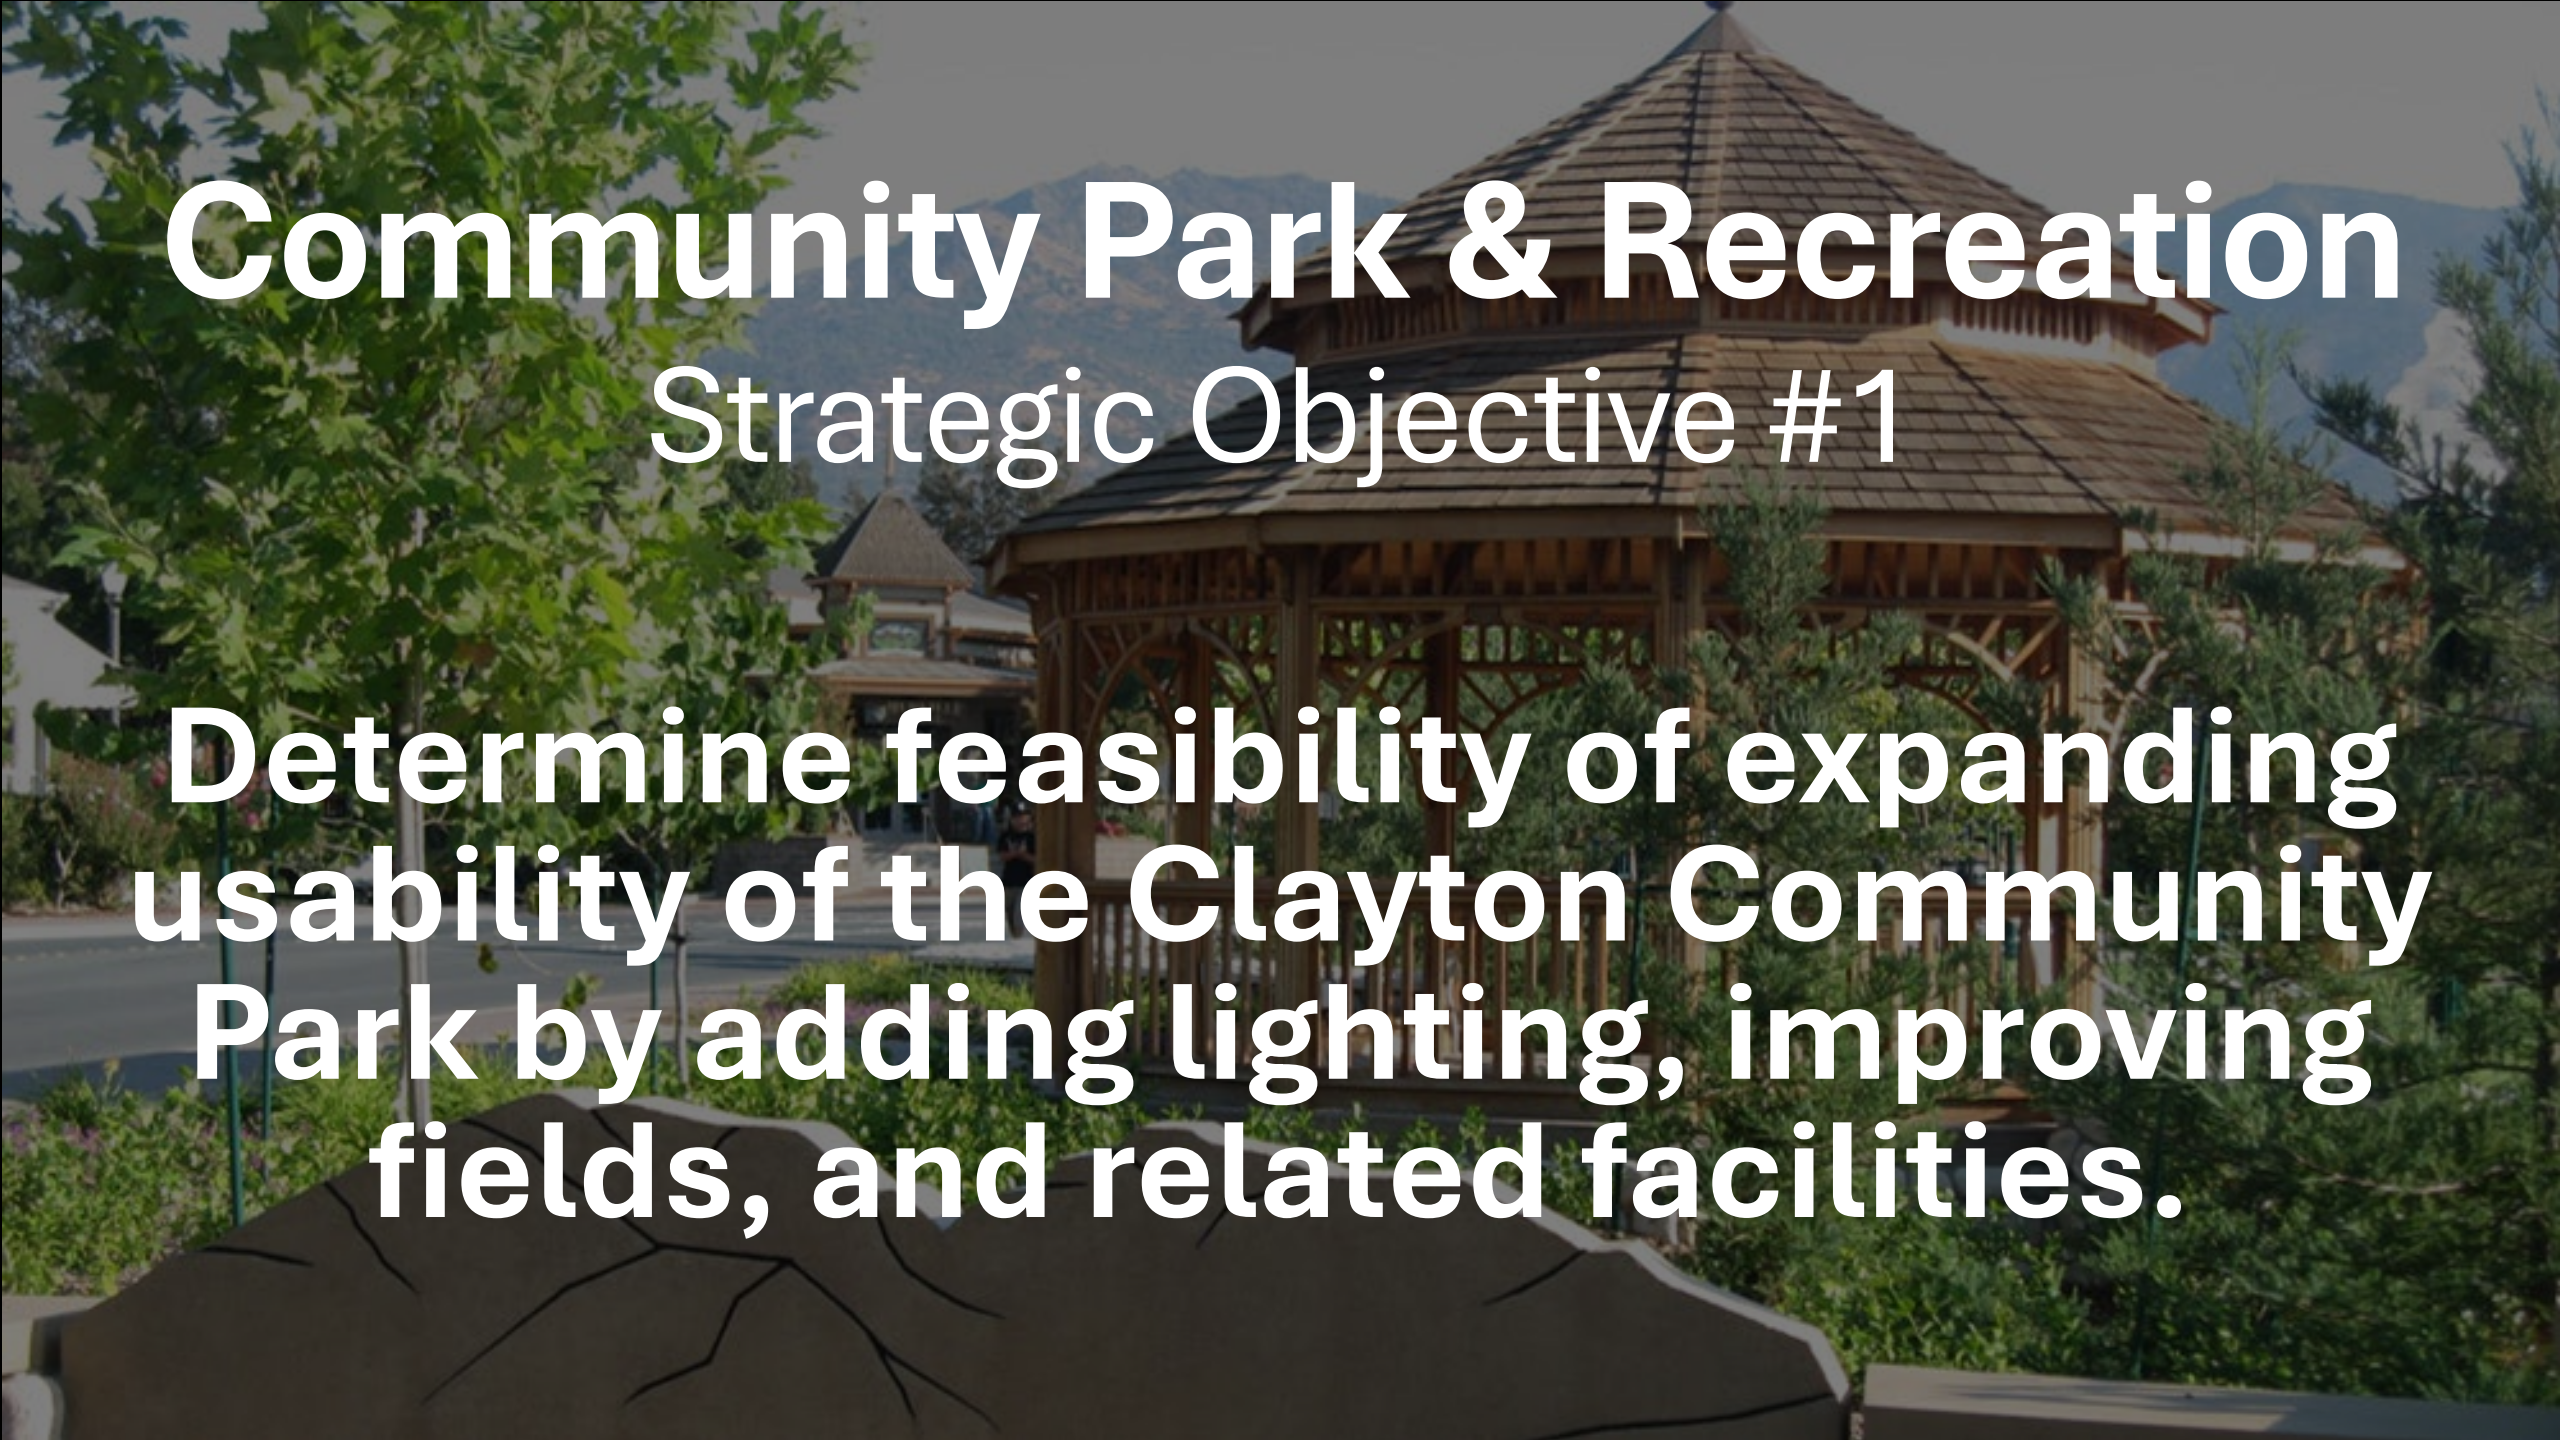
- Develop a city-wide improved pedestrian accessibility plan that includes general pedestrian and roadway safety (striping/repaving/bicycle lanes), safety around schools, and ADA improvements

- Create a comprehensive Maintenance and Repair strategy with mapping and a timeline that identifies where the work/repairs need to be done and costs for completion

Community Park & Recreation

Jeff Wan & Peter Cloven

Background - The primary focus was on the Clayton Community Park and whether associated improvements could be considered including lighting for ball fields, pickle ball courts, swimming pools, and “community center” space. The secondary focus was related recreation programs and facilities related to youth/senior programs. Typically, these are handled by a Parks & Recreation Department which Clayton does not have or fund.



Community Park & Recreation

Strategic Objective #1

Determine feasibility of expanding usability of the Clayton Community Park by adding lighting, improving fields, and related facilities.

Community Park & Recreation

Strategic Objective #2

Recreation Programs/Facilities were not factored into the Strategic Goal of a committee member, and it was postulated that that this could be its own Strategic Goal outside of Community Parks & Recreation. As such, an alternate Strategic Objective is provided for discussion (within this goal, or on its own merits).

Explore options and locations for youth and/or senior recreation programs and whether existing facilities would suffice for those needs.

Economic Development

Kim Trupiano & Peter Cloven

Common Vision - A vibrant downtown business atmosphere that is:

1) Compatible with the size and needs that our community will support
2) Create business and tax revenue beyond just Clayton residents

Economic Development Strategic Objectives

1) Commission an "Economic Development Plan" to evaluate support existing and create new businesses. Include the review of prior plans/studies plan (as appropriate)

2) Institution of a conscious "City Business Spotlight" though city media (e.g., city website, city manager newsletter) to highlight new and existing businesses.

Community Police
Holly Tillman & Peter Cloven

Common Vision - Maintain a vibrant police for with a strong community policing model

Community Police Strategic Objective

Continue to prioritize public safety and community based policing

Local Aesthetic/Landscape

Jim Diaz & Peter Cloven

Common Vision - Make public areas (roads, medians, trails and parks) visibly appealing in terms of weed abatement, vegetation trimming, and irrigation systems.

Local Aesthetic/Landscape Strategic Objective

Prioritize funding of the Landscape and Maintenance District (LMD).

Environmental Sustainability

Holly Tillman & Peter Cloven

Background - Clayton has started energy & water conservation efforts via our contract with Climatec (solar, LED, and water controls).

While these are good “first steps,” we do not know how these actions have reduced our energy/water use, or waste reductions. As a city, we do not know our annual energy use and, as such, cannot commit to future reductions energy/resource usage.

Environmental Sustainability

Strategic Objective

Pursue bids for a Climate Action Plan (CAP) and assess priority from a budget standpoint

Disaster Preparedness & Fire Prevention

Holly Tillman & Jim Diaz

Common Vision - Implement an effective disaster preparedness program

Disaster Preparedness & Fire Prevention
Strategic Objective

- Redevelop emergency management training for Staff and/or Councilmembers
  - Resurrect Emergency Operations Center exercises and FEMA preparedness classes
- Promote disaster preparedness by utilizing social media and community alert notifications (Nixle, Zonehaven Aware, CWS)
